AT&T ISRAEL
*Where passion
meets technology*

About AT&T

AT&T is an American, multinational telecommunications corporation and the largest provider of mobile telephones in the United States. AT&T is the 20th-largest mobile telecom operator in the world, with over 250 million mobile customers and over 300,000 employees worldwide.

In 2007 AT&T opened its first R&D center in Israel. AT&T Israel is a part of the AT&T Technology Development Organization. The site in Israel employs hundreds of engineers, both in Israel and in the US. The Israeli site is involved in several core business projects of AT&T, including: software-defined networking, cloud computing, security, voice & web conferencing, IPTV, and more.

Come join our winning team!

Senior Data Scientist JB-588

AT&T is leveraging Machine Learning over Big Data, integrating multiple, large-scale data sources and open source Big Data platforms, to create Data Driven Automation solutions. We are looking for a Data Scientist who is highly self-motivated and can interact with a world-class research and development organization.

This role involves hands-on use of cutting-edge technologies in the space of Big Data Analytics, machine learning and data visualization.

It is important that our candidate has a strong background in statistics, acute business sense and practical programming skills. We expect the candidate to be a highly motivated and result-focused individual.

A successful candidate for this role will have a wide interdisciplinary professional skill-set. The candidate will be proficient in turning data discoveries into profitable products and measurable improvements for our business partners, in short development cycles.

The job involves:

- ❖ Researching AT&T and industry Big Data sources to identify potential applications and patterns
- ❖ Researching and evaluating the feasibility of Big Data applications
- ❖ Analyzing large amounts of data from different domains
- ❖ Involvement in a process of designing and developing data-driven products
- ❖ Working closely with an array of various teams and organizations in the organization to collect requirements and design solution architectures
- ❖ Implementing of machine learning software systems and tools using industry-standard infrastructures and libraries, and up-to-date software development practices.

Required Skills:

- ❖ At least 3 years' experience in Data Science/Big Data Analytics/Data Engineering
- ❖ Strong expertise in statistical modeling, machine learning systems, software engineering and implementation of algorithmic solutions
- ❖ Experience in Big Data ETL processes, data visualization, data exploration
- ❖ Experience in data science oriented tools, languages and libraries (MATLAB/Octave, Excel, R, Python + Scikit-learn + pandas, WEKA, MLLib/ML, TensorFlow/Keras etc.).
- ❖ Excellent interpersonal and communicational skills, major team player
- ❖ Bachelor in Mathematics/Statistics/Computer Science
- ❖ Strong familiarity with Big Data architectures and technology including OpenStack, Hadoop, Pig, Hive, H-base, Spark, Elasticsearch, or other big data platforms

Additional:

- ❖ Experience with Embedded systems, Internet of Things applications--an advantage
- ❖ Relevant Exact/Natural Sciences Master's degree or above--an advantage
- ❖ Experience in real-time analytics, NoSQL data stores--an advantage
- ❖ Experience in the telecommunications industry--an advantage

Please send your CVs to joinus@list.att.com

Employment is through a contractor

Lead Architect JB-581

For AT&T's ECOMP (Enhanced Control, Orchestration, Management & Policy) platform development, we are looking for an experienced lead architect to lead a team to build Cloud, VNF Operations Management and Control solutions for AT&T.

The role involves working closely with AT&T's U.S.-based teams and with AT&T's Israeli-based R&D center.

Qualifications:

- ❖ At least 3 years' experience in leading an architecture team
- ❖ At least 10 years' experience in the Software industry
- ❖ At least 7 years' experience in defining architecture for complex software and communications systems
- ❖ Ability to plan and design new complex infrastructure and application services that interact across networked application components and technologies
- ❖ Experience with cloud computing and hosted systems
- ❖ Experience in architecting network orchestration and management systems - an advantage
- ❖ Experience in architecting web based management systems - an advantage
- ❖ Experience in Database and NoSQL technologies - an advantage
- ❖ Experience with open source projects - an advantage
- ❖ Experience in building solutions for the Telco industry – an advantage
- ❖ Deep knowledge in networking – an advantage
- ❖ Experience with SDN/NFV – an advantage
- ❖ Knowledge in Radio Access Networks –an advantage
- ❖ Excellent communications skills
- ❖ Proven experience working with US-based corporations
- ❖ Self-learner and team player who loves sharing ideas and knowledge

Additional:

- ❖ Bachelor's Degree (Master's degree – advantage)
- ❖ Excellent English (mother tongue - advantage)

Please send your CVs to joinus@list.att.com

Web Architect JB-612

Att.com site gets millions of hits per day. AT&T is redesigning the consumer sales experience using cutting edge technologies, hence we are looking for a Senior Web Architect to participate in re-building AT&T's consumer sales experience.

As Web Architect, you will lead web-based projects and web development teams, study, analyze, and make decisions about choosing web technologies.

Some of the job roles are providing architecture and design documents, mentoring developers, as well as developing the web domain within the company.

Job Requirements:

- ❖ B.Sc. in Computer Sciences/Computer Engineering/Mathematics or equivalent. M.Sc. is advantage
- ❖ At least 10 years of experience in the software industry.
- ❖ At least 5 years of experience as SW architect, defining architecture for complex software and communications systems.
- ❖ Proven track record in web applications development, specifically SPAs
- ❖ Experience in building solutions for large scale, cross browsers (including mobiles), responsive end user consumers web sites/web applications
- ❖ Excellent expertise in HTML5, JavaScript (ECMAScript 6/7, TypeScript) and CSS3 (SCSS/SASS) – aka “vanilla JS”
- ❖ Expertise working with advanced tools such as Webpack, Babel, Flow, etc..
- ❖ Experience with performance aspects on mobile web apps – RAIL model

Employment is through a contractor

- ❖ Experience with PWA, AMP/Facebook articles
- ❖ Experience working with RESTful APIs, JSON, XML, WebSockets, HTTP2
- ❖ Experience with RWD and AWD developments in web apps
- ❖ Knowledge of server-side programming, e.g. PHP, JAVA or Node.js
- ❖ Knowledge of web servers' configuration and deployment, e.g. Tomcat, nginx
- ❖ Familiarity with JavaScript frameworks and isomorphic JavaScript, e.g. react, preact, angular, vue, etc..
- ❖ Familiarity with react's state management solutions, e.g. redux, mobx, Apollo client, relay modern
- ❖ Familiarity with unit testing frameworks, e.g. Jasmine
- ❖ Familiarity with mocking frameworks, e.g. Sinon.JS
- ❖ Familiarity with cross-platform (mobile & desktop) frameworks that are packaged into native apps, e.g. ReactNative, NativeScript
- ❖ Experience in profiling web application and optimizations patterns
- ❖ Experience working in Agile / Scrum environments, SAFe is an advantage
- ❖ Outstanding communication and presentation abilities

The following areas of knowledge or experience will be considered as an advantage:

- ❖ GraphQL, Relay
- ❖ Static site generation – Gatsby.js, react-static
- ❖ Servers workers, background sync, PRPL pattern
- ❖ WebComponents
- ❖ Kubernetes, Docker, Swagger, Kafka, Couchbase
- ❖ Analytics collecting

Please send your CVs to joinus@list.att.com

TV Architect JB-585

Job description:

We're looking for an experienced, professional, and highly motivated Android/iOS architect to join our next cutting-edge AT&T -OTT Netflix competitor!

Think about a TV, not an app, that supports any Android/iOS device, including Smartphones, Tablets, Android TV, Wearables & Amazon Fire TV, (Apple TV to bring TV everywhere!) and Apple TV

The role involves close work with AT&T's U.S.-based teams and with AT&T's Israeli-based R&D center.

Requirements:

- ❖ At least 10 years of experience in the software industry
- ❖ At least 3 years of experience in defining architecture for complex software and communications systems
- ❖ Experience in software architecture and design patterns implementation
- ❖ Ability to plan and design new complex infrastructure and application services that interact across networked application components and technologies
- ❖ Experience with Java/Swift and Android / iOS architecture (iOS an advantage)
- ❖ Excellent communications skills
- ❖ Proven experience working with US-based corporations
- ❖ Self-learner, team player who enjoys sharing ideas and knowledge
- ❖ Strong problem-solving and critical-thinking skills
- ❖ Experience with Android/iOS internals

Desirable:

- ❖ Knowledge of video streaming technologies
- ❖ Bachelor's Degree (Master's Degree – an advantage)
- ❖ Excellent English (mother tongue - an advantage)

Employment is through a contractor

Please send your CVs to joinus@list.att.com

Domain 2.0 Architect JB-614

Job Description:

For AT&T's growing cloud & Software Defined Network, we are looking for a well experienced architect to join a team building cloud, NFV and SDN solutions for AT&T.

The role involves intimate work with AT&T's US based CTO teams and with AT&T's Israeli based R&D center.

Qualifications:

- ❖ At least 10 years of experience in the Software industry
- ❖ At least 5 years of experience in defining architecture for complex software and communications systems.
- ❖ Experience in building solutions for Telco networks.
- ❖ Ability to plan and design new complex infrastructure and application services that interact across networked application components and technologies
- ❖ Excellent communications skills.
- ❖ Proven experience working with US based corporations
- ❖ Self-learner, Team player loving sharing ideas and knowledge
- ❖ Ability to gather and analyze broad business requirements, technology trends, and existing constraints to construct integrated application architecture and processes.
- ❖ Expertise at Layer 2 Ethernet/MPLS and Layer 3 IP/router packet technologies
- ❖ Extensive knowledge of: IP and data networking; IP control and signaling protocols (OSPF, BGP, LDP, RSVP).
- ❖ Experience with the use of SDN, Network/Platform Orchestrators, real-time network functions such a PE/CE routers, firewalls, load balancers
- ❖ Experience and deep knowledge with Cloud Computing and hosted systems
- ❖ Experience with hypervisors like KVM and VMWare, and virtual networking using vRouters, vSwitches
- ❖ Experience optical network architectures and optical control planes – an advantage
- ❖ Experience with OpenDaylight –an advantage
- ❖ Experience with Openstack – an advantage.
- ❖ Ability to drive new ideas to the business and present it in front of senior executives

Additional:

- ❖ Bachelor's Degree (Master's Degree – Advantage)
- ❖ Excellent English (mother tongue- Advantage)

Please send your CV's to jobsisr@intl.att.com

Senior Automation Engineer JB-599

Senior Automation Engineer is required to test different APIs and Web Applications for Service Design and Creation (SDC) systems and taking a part of Infrastructure building as part of the E2E Automation team.

SDC is visual modeling and design tool that creates internal metadata that describes assets used by other components, both at design time and run time.

The ASDC manages the content of a catalog, and logical assemblies of selected catalog items to completely define how and when VNFs are realized in a target environment

Mandatory skills:

- ❖ Bachelor degree in Computer Science/Computer Engineering

Employment is through a contractor

- ❖ At least 2 years' experience in writing automation tests for Web applications
- ❖ Experience required in all the following:
 - Experience in Python programming – Required
 - Experience with Selenium testing automation Framework - Required
 - Experience with Robot Framework - Advantage
 - Good familiarity with Linux OS – Required
 - Deep knowledge of following Protocols HTTP, REST, SOAP– Required
 - Knowledge of continuous integration/delivery – Required
 - Deep knowledge of the Testing and Product lifecycles – Required
- ❖ In addition, the candidate should have these attributes:
 - Knowledge of Agile Methodologies, TDD and ATDD
 - Fluent English (reading and understanding) with ability to write documents
 - Ability to view System perspective and to perform thorough investigations
 - Self-learner
 - Highly independent, team-player, responsible and enterprising
 - 100% capacity, with willingness for overtime

Please send your CVs to joinus@list.att.com

Senior IOS Developer JB-615

Job description:

We're looking for an experienced, professional, and highly motivated iOS engineer to join our cutting-edge iOS group developing the next AT&T entertainment solution!

Think of a TV, not an app, that supports any Apple device including: iPhone, iPad, Apple TV to bring the TV everywhere!

It's going to get lots of attention in the industry and be used by millions of users!

Requirements:

- ❖ B.S. or M.S. in Computer Science or a related field
- ❖ 5+ years development experience with excellent software engineering skills
- ❖ 3+ years of developing complex tvOS/iOS applications
- ❖ Solid experience with developing in Swift
- ❖ Excellent analytical capabilities with strong problem solving abilities
- ❖ Passion for high-quality developing while being responsible for full testing coverage including unit tests and automation.
- ❖ Excellent personal communication skills and a team player
- ❖ Independent, self-disciplined with excellent independent-learning capabilities
- ❖ Can work in areas outside comfort zone and get things done quickly

Desirable:

- ❖ Experience developing on server-side and other platforms
- ❖ Experience with video/audio applications and SDKs

Please send your CVs to joinus@list.att.com

Junior FED Developer JB-624

Job description:

We are looking for a Junior Developer who is motivated to combine the art of design with the art of programming.

The candidate will join our team of experienced, young spirit and motivated client engineers, with a variety of backgrounds and skills.

The candidate will be working on challenging problems ranging from complex and performance UIs to service and performance optimization.

**Required Skills:**

- ❖ Highly-motivated
- ❖ At least 3 years' experience of client side development.
- ❖ Strong Object Oriented Design and Development capabilities.
- ❖ Experience with client-side technologies and MVC (Model-View-Controller) pattern
- ❖ Experience with integrating with services
- ❖ Ability to work independently or collaborate within a team environment
- ❖ Good problem solving skills. Understand cause and effect and how to break down difficult problems.
- ❖ Self-learning and testing skills

Advantage:

- ❖ Strong UI and design skills

Please send your CVs to joinus@list.att.com

Backend Java developer JB-622

We are opening a position for a Java Backend developer in Entertainment LOB.

We are looking for a skilled, quick learner, developer to join a core dynamic project in AT&T.

Our candidates should have strong Java backend skills and should have previous experience or a passion to learn web.

The candidates should have team player abilities, and the capabilities of working in a dynamic, changing environment.

Mandatory skills:

- ❖ 5 years' experience in Java backend development
- ❖ Object Oriented Design and Development
- ❖ Experience in Multi-thread development
- ❖ Experience working in Spring
- ❖ Experience in Data Base - NoSQL (Coachbase, MongoDB)

Advantages:

- ❖ Experience with Kubernetes, Dockers
- ❖ Experience working with Elasticsearch/Kibana
- ❖ Experience in Web development (AngularJS, Angular, TypeScript, CSS, HTML, NodeJS)

Please send your CVs to joinus@list.att.com

Senior Fullstack Developer JB-601

- ❖ Angular 2/4/5 and/or ReactJS
- ❖ Node.js
- ❖ Javascript / TypeScript
- ❖ Fast learner of new technologies
- ❖ Java/C#
- ❖ Familiar with Docker containers technology – an advantage
- ❖ Knowledge in Kubernetes/Dockers - Advantage
- ❖ Azure/AWS
- ❖ Knowledge in Linux, Windows
- ❖ Experience with SQL and Non-SQL Databases (such as: MS-SQL, MySQL, Elasticsearch) - an advantage
- ❖ Good verbal and written English
- ❖ Initiative & out-of-the-box thinking

Employment is through a contractor

- ❖ Team player with good interpersonal skills

Please send your CVs to joinus@list.att.com

Frontend Web Developer JB-623

Job description:

We are looking for a Web Developer who is enthusiastic about putting new technologies to use. The candidate will be joining our team of experienced, skilled and motivated front-end engineers, who come from a variety of backgrounds.

Required Skills:

- Three years of experience in Frontend development
- Deep Knowledge of CSS3, HTML5, AJAX, JavaScript and Angular or react
- Strong object-oriented design and development capabilities
- Experience with modern browser technologies
- Strong Passion for front-end development
- Deep knowledge and understanding of client-side architecture and experience in building large scale web applications
- Extensive understanding of cross-browser compatibility issues and ways to work around them
- Team player, innovative and creative, able to see the “big picture” and take part in shaping the product

Advantages:

- Experience with React
- Experience with TypeScript
- Experience with SCSS, LESS
- Experience with NPM, WEBPACK
- Experience with responsive layouts
- Extensive understanding of code versioning tools, such as Git
- Strong UI and design skills

Please send your CVs to joinus@list.att.com

Backend/Full stack developer JB-598

We are opening a position for a Backend/Full stack developer in SEI. Here is our job description (Oren, feel free to add/modify/remove items):

We are looking for a skilled, quick learner, Java backend developer to join a core dynamic project in AT&T.

Our candidates should have strong Java backend skills, and should have previous experience or a passion to learn web and mobile development.

The candidates should have team player abilities, and the capabilities of working in a dynamic, changing environment.

Mandatory skills:

- ❖ 5 years' experience in Java backend development
- ❖ Experience in SQL (Oracle, MySQL) or NoSQL (MongoDB, Elasticsearch) databases
- ❖ Object Oriented Design and Development
- ❖ Experience in Multi-thread development
- ❖ Experience with REST APIs
- ❖ Experience working in a Linux environment

Employment is through a contractor

**Advantages:**

- ❖ Experience in Web development (AngularJS, Angular, TypeScript, CSS, HTML, NodeJS)
- ❖ Experience in Android development
- ❖ Experience working with Elasticsearch/Kibana
- ❖ Experience with Tomcat
- ❖ Experience working in Spring

Please send your CVs to joinus@list.att.com

Full-stack Web Developer JB-597

Job description:

We are looking for a Web Developer who is enthusiastic about combining the a great design with the art of programming.

The candidate will be joining our team of experienced, skilled and motivated front-end engineers, who come from a variety of backgrounds.

The candidate will work on the New High Performing Complex SPA.

Required Skills:

- a true team player.
- Three years of experience in developing CSS3, HTML5, AJAX, JavaScript
- Strong object-oriented design and development capabilities
- Experience with modern browser technologies
- Extensive understanding of cross-browser compatibility issues and ways to work around them
- Experience with Angular or, preferably, with react
- Experience with NODE.JS or java
- Extensive understanding of code versioning tools, such as Git
- Experience with SCSS, LESS - advantage
- Knowledge in Kubernetes/Dockers – Advantage

Please send your CVs to joinus@list.att.com

Backend Software Engineer JB-597

To join some exciting new projects based on Micro Services we are looking for talented backend developers, with at least 3 years' experience with JAVA.

Advanced experience and knowledge in the following areas:

- Positive team player attitude with excellent verbal and written communication skills.
- Must have experience and deep knowledge in JAVA Application Server oriented development
- Full accountability to code quality, including profounf Unit testing, end-to-end testing and automation – a must
- Must have experience in Multithreading, Designed Patterns, OOP & OOD
- Experience and knowledge with NoSql (Mongo, Cassandra) – Advantage
- Experience and knowledge with Spring Boot – Advantage
- Self-motivated and willing to “do what it takes” to get the job done, “can do” attitude.

Please send your CVs to joinus@list.att.com

Frontend Web Developer JB-597

Employment is through a contractor

**Job description:**

We are looking for a Web Developer who is enthusiastic about putting new technologies to use. The candidate will be joining our team of experienced, skilled and motivated front-end engineers, who come from a variety of backgrounds.

The candidate will work on UI application Used for designing Services in a cloud environment.

Required Skills:

- Three years of experience in Frontend development
- Deep Knowledge of CSS3, HTML5, AJAX, JavaScript and Angular or react
- Strong object-oriented design and development capabilities
- Experience with modern browser technologies
- Strong Passion for front-end development
- Deep knowledge and understanding of client-side architecture and experience in building large scale web applications
- Extensive understanding of cross-browser compatibility issues and ways to work around them
- Team player, innovative and creative, able to see the “big picture” and take part in shaping the product

Advantages:

- Experience with React
- Experience with TypeScript
- Experience with SCSS, LESS
- Experience with NPM, WEBPACK
- Experience with responsive layouts
- Extensive understanding of code versioning tools, such as Git
- Solid understanding and experience developing in modern Agile environment (Continuous Integration, Iterative Development, etc.)
- Strong UI and design skills

Please send your CVs to joinus@list.att.com

FE/Full stack Developer JB-596

For a project in the cloud domain, we are looking for a FE/full stack developer who will act as a UI expert and also support overall project development, as part of Agile team.

Required Skills:

- ❖ UI Developer Expert – Angular 1.x - Must
- ❖ TypeScript knowledge – Must
- ❖ Experience in relevant technologies (HTML, CSS, JavaScript) – Must
- ❖ Basic knowledge in Linux - Must
- ❖ Angular 2+ - Advantage
- ❖ Java/C# experience – Advantage
- ❖ Git – Advantage
- ❖ Experience in Selenium/other similar testing infrastructure - Advantage
- ❖ Software engineering skills
- ❖ Great team player
- ❖ Can-do approach

Please send your CVs to joinus@list.att.com

JAVA Software Engineer for D2.0 JB-594

Employment is through a contractor

**Job description :**

We are looking for a Java Developer that will join our team of experienced motivated full-stack engineers, who come from a variety of backgrounds and skills. The candidate will work on a set of applications used to design services in a cloud environment. They will be facing challenging problems ranging from performance issues in the UIs, to a variety of server side logical and technical challenges. Our perfect candidate will be passionate about quality and clean code practices, with a positive attitude and can-do approach

Requirements:

At least 5 years' experience in JAVA and JEE
University degree in Computers Science or Software Engineering

Advanced experience and knowledge in the following areas:

- ❖ Must have experience and deep knowledge in JAVA Application Server oriented development
- ❖ Must have experience in Multithreading, Designed Patterns, OOP & OOD
- ❖ Experience and knowledge in Graph DB – Big Advantage
- ❖ Hands on experience in Jetty – Big Advantage
- ❖ Debugging and performance analysis capabilities.
- ❖ Positive team player attitude with excellent verbal and written communication skills.

Please send your CVs to joinus@list.att.com

Senior Android Developer JB-593

We are looking for a skilled, fast learner, Android developer to join a core dynamic project in AT&T.

Our candidates should have strong Java backend skills and should have previous experience or a passion to learn mobile development as well as backend development.

The candidates should have team player abilities, and the capabilities of working in a dynamic, changing environment.

Mandatory skills:

- ❖ 5 years' experience in Android development
- ❖ Experience in SQL databases
- ❖ Object Oriented Design and Development
- ❖ Experience in Multi-thread development
- ❖ Experience with communication aspects in Android
- ❖ Experience with REST APIs
- ❖ Experience working in Agile

Advantages:

- ❖ Experience in Android Video and Audio APIs
- ❖ Experience in Android internals
- ❖ Experience in Java Backend and/or frontend development

Please send your CVs to joinus@list.att.com

FE/Full stack Developer JB-590

For a new project in the cloud domain we are looking for a full-stack developer with the following capabilities:

- ❖ UI Developer Expert – Angular 2+ - Must
- ❖ Experience in Technologies (HTML, CSS, JavaScript, ecma script 6 etc...)

Employment is through a contractor

- ❖ Java/C# experience - Advantage
- ❖ Software engineering skills
- ❖ Fast learner of new technologies
- ❖ Great team player
- ❖ Knowledge in Linux
- ❖ Knowledge in Kubernetes/Dockers - Advantage
- ❖ GIT (advantage)

Please send your CVs to joinus@list.att.com

Big Data Software Engineer JB-586

The leading IoT development platform in AT&T is looking for a big data developer. We are working on a new feature of big data analytics, for which we need to invest a great deal of research and development.

Mandatory:

- ❖ Relevant academic degree
- ❖ At least 5 years of development experience
- ❖ Excellent knowledge of Java, J2EE, multithreading, application servers, frameworks-
- ❖ At least 1 years' experience with big data technologies
- ❖ Team player and self-driven

Optional:

- ❖ Apache Spark, Apache Flink, Cassandra, Kafka, ZooKeeper– Strong advantage
- ❖ Scala– Strong advantage

Please send your CVs to joinus@list.att.com

Full-stack Web Developer JB-583

Job description:

We are looking for a Web Developer who is a *true team player* and enthusiastic about new technologies.

Required Skills:

- ❖ Two years of experience in developing Angular or React, CSS3, HTML5, JavaScript
- ❖ Strong object-oriented design and development capabilities
- ❖ Experience with modern browser technologies
- ❖ Experience with NODE.JS
- ❖ Experience with SCSS, LESS
- ❖ Extensive understanding of Agile and DevOps culture

Please send your CVs to joinus@list.att.com

Full-Stack developer JB-583

Job description

We are looking for a skilled and motivated developer to join our team of professionals!

Requirements

The ideal candidate for this position must be a true team player, with has solid back-end skills (Java, Node.JS, SQL and NonSQL, RESTFul APIs). The candidate must have a passion for learning and experiencing different technologies as well as developing in a dynamic environment.

Employment is through a contractor

- ❖ Object Oriented Design and Development capabilities
- ❖ Ability to quickly and independently engage in a project with leading edge technologies
- ❖ Team player that can also lead independent work
- ❖ Experience with SQL and Non-SQL Databases (such as: MySQL, Oracle, MongoDB, Elasticsearch) - an advantage
- ❖ Experience with JavaScript, Typescript, CSS, HTML 5, Angular, Node.JS - an advantage

Please send your CVs to joinus@list.att.com

Linux DevOps Junior JB-600

- You are thrilled to be part of long distance journey?
 - You are getting sparkling bright eyes from technological challenges?
 - Rapid movement isn't combination of "bad" words?
- If all 3 answers are YEA; your place is definitely with us!

AT&T is one of the biggest North American carriers, where technological dreams turns into reality. AT&T Center of Excellence in Israel is hiring the best DevOps experts for heterogeneous projects in all domains; Entertainment , Security , Networking , Cloud , IoT , Web , Mobile

The position requires:

- ❖ 2+ years of experience using and administering Linux

At least one of the below:

- ❖ Networking: strong understanding of TCP/IP and UDP, sub-netting, firewalls, VPNs.
- ❖ Experience with JVM based deployments.
- ❖ Experience and understanding HTTP protocol and methodology.
 - Scripting: experience in scripting languages
- ❖ Bachelor's degree.
- *Relevant Military course (MMRAM)
- ❖ Experience in security
- ❖ Experience with cloud deployments: AWS / AZURE / Google etc.
- ❖ Experience with **Jenkins**, SCM tools, CI/CD pipelines
- ❖ Experience with containers: building images, **Dockers**, K8S
- ❖ Experience with Elastic Search, MongoDB, mySQL

Please send your CVs to joinus@list.att.com

Linux DevOps Expert JB-600

- You are thrilled to be part of long distance journey?
 - You are getting sparkling bright eyes from technological challenges?
 - Rapid movement isn't combination of "bad" words?
- If all 3 answers are YEA; your place is definitely with us!

AT&T is one of the biggest North American carriers, where technological dreams turns into reality. AT&T Center of Excellence in Israel is hiring the best DevOps experts for heterogeneous projects in all domains; Cloud, Conferencing, Virtualization, Federation, IPTV, VoIP and more

The position requires:

- ❖ 5+ years of experience using and administering linux/Sun OS
- ❖ Scripting: experience in multiple scripting languages.
- ❖ Experience with cloud deployments (at least one – is a must): AWS / AZURE / Google etc.

Employment is through a contractor

- ❖ Networking: strong understanding of TCP/IP and UDP, sub-netting, firewalls, VPNs.
- ❖ Experience with JVM based deployments.
- ❖ Experience and understanding HTTP protocol and methodology.
- ❖ Experience in multiplex cloud eco system deploy and trouble shooting
- ❖ Must be able to operate independently and establish solid working relationships with peers
- ❖ Experience with containers: building images, Docker, K8S

Advantages:

- ❖ Bachelor's degree.
- ❖ Experience in security

Please send your CVs to joinus@list.att.com

DevOps Expert JB-605

AT&T is one of the biggest North American carriers, where technological dreams turns into reality. AT&T Center of Excellence in Israel is hiring the best DevOps experts for heterogeneous projects in all domains; Cloud, Conferencing, Virtualization, Federation, IPTV, VoIP and more

The position requires:

Tier4 Support Engineer JB- 582

AT&T Development Center, (located in Airport City) has an opening for a Tier4 support engineer to provide Tier4 technical support for communications applications.

The Support engineer is required to support US-based operation teams and manage critical problems.

Required Skills:

- ❖ At least 3 years' experience supporting international customers as an expert.
- ❖ Required proven practical experience in managing customer issues and crises in a production environment
- ❖ Technical background in the following:
 - Practical working experience with Linux distributions (RHEL, CENTOS etc.)
 - Practical experience in at least one of the following scripting languages: Python, Perl, Bash
 - Practical experience in at least one of the following languages: Neo4j, Java, JavaScript – an advantage.
 - Practical experience in SQL & NoSQL databases such as MySql, Mongo, Elasticsearch and Cassandra – an advantage
 - Familiar with Docker containers technology – an advantage
 - Familiar with Amazon AWS & Microsoft AZURE cloud solutions – an advantage
- ❖ In addition, the candidate should have these attributes:
 - High level of verbal and written English

Employment is through a contractor

- Initiative & out-of-the-box thinking
- Team player with good interpersonal skills
- Service oriented
- Ability to organize
- Highly motivated and willing to work hard

Please send your CVs to joinus@list.att.com

System QA and Integration Engineer JB-606 זמני לחצי שנה

Senior QA Engineer is required to test large scale telecom systems and lead tasks as part of the QA team.

Main Responsibilities:

- ❖ Define system testing strategy
- ❖ System tests execution
- ❖ Leading integration with external components in different geo locations
- ❖ Working on CI/CD processes

Requirements:

- ❖ At least 4 years' experience in software QA & integration of large & complex network systems required
- ❖ Deep knowledge of the Testing and Product lifecycles
- ❖ Experience in Linux required
- ❖ Knowledge of continuous integration systems - Jenkins
- ❖ Experience in automation Java, Python – big advantage
- ❖ Deep knowledge of HTTP, REST, SIP
- ❖ Familiarity with Dockers
- ❖ DevOps experience – big advantage
- ❖ Excellent interpersonal and team skills

Please send your CVs to joinus@list.att.com

Senior QA Engineer (Manual and Automation) JB-607 זמני לחצי שנה

- ❖ Senior QA Engineer is required to test different APIs and products for large scale systems and lead tasks as part of the QA team.
- ❖ Bachelor degree in Computer Science/Computer Engineering
- ❖ At least 4 years' experience in software QA with large complex systems required
- ❖ Deep knowledge of the Testing and Product lifecycles
- ❖ Experience in Cassandra DB - advantage
- ❖ Experience in Linux required
- ❖ Knowledge of continuous integration systems
- ❖ Experience in writing automation tests for applications
- ❖ Experience in Java programming
- ❖ Deep knowledge of HTTP, REST, SOAP
- ❖ Experience working with UI test automation tools (e.g. Selenium)
- ❖ Experience working with Java test automation frameworks (e.g. JUnit, JSystem, JMeter, JBehave)
- ❖ Knowledge of following technologies is advantage: Jetty
- ❖ Knowledge of Agile Methodologies
- ❖ Self-learner

Product Manager for ASDC project JB-563

We are looking for an experienced Product Manager who is passionate about creating products that change the way we think about network communication.

We are looking for an experienced Product Manager who is passionate about creating products that customers love. As a Product Manager, you will be involved in every aspect of the product development process, from brainstorming the next product innovation, to working directly with designers and engineers to implement features.

You will join a dynamic and fast-paced environment and work with cross-functional teams to design, build, and roll-out products that deliver AT&T's network vision and strategy.

Responsibilities:

- ❖ Develop a deep understanding of the AT&T network and cloud business objectives, and identify and fill product gaps and generate new ideas to improve functionality and user experience, and drive growth.
- ❖ Translate product strategy into detailed requirements and prototypes.
- ❖ Work hands-on with designers and engineers to implement and build new features that meet our standards of simplicity and quality.
- ❖ Run our agile process by building a backlog, leading the standups, etc.
- ❖ Drive product launches including working with marketing team, executives, and other teams
- ❖ Act as a product evangelist to build awareness and understanding of AT&T network.

Requirements:

- ❖ Smart, very smart - you should have an in depth and nuanced understanding of how people and businesses operate.
- ❖ Outstanding analytic skills, knows and understands data and analyze metrics that inform the success of products.
- ❖ Creative, thinks outside of the box.
- ❖ Be experienced and savvy with tech: understand PCs, smartphones, the Internet, social platforms, etc.
- ❖ Understand how things work, at the deepest levels, in software design, data structures, APIs, etc
- ❖ 5+ years of proven working experience in product management, specifically in leading web-application for business products in an agile environment, ideally with networking and Software Defined Networks.
- ❖ 5+ years of experience in technical architecture of web applications
- ❖ Proven track record of managing all aspects of a successful product throughout its lifecycle.
- ❖ Proven ability to develop product and marketing strategies and effectively communicate recommendations to executive management.
- ❖ Integrate usability studies, research and market analysis into product requirements to enhance user satisfaction.
- ❖ Experience developing market place products, technologies and platforms is strongly desired.
- ❖ Team-player, self-managed and fast-learner: A never-ending desire to grow and learn.
- ❖ Excellent English.
- ❖ BSc degree or similar (Computer science or other engineering background).

Business Development Manager JB-620

Job Description:

Employment is through a contractor

Looking for a Business Development Manager, to lead penetration into new fields and domains.

AT&T is developing in Israel some of its most challenging technologies, such as its groundbreaking DirecTV Now service. It is also pioneering in building-cutting edge technologies in the field of advertising.

Combining the roles of a visionary, an orchestrator and a leader, the Business Development manager will be responsible to work with the different business groups in AT&T, understand their challenges and needs, and make it happen! He'll work closely with the Product, Architecture and Development teams to realize new concepts all the way from inception to production.

Responsibilities:

- ❖ A member of the Product Management leadership team.
- ❖ Understanding the challenges and opportunities within different business groups in AT&T (US).
- ❖ Incepting innovative concepts, products and solutions.
- ❖ Ad-hoc management of special 'task force' teams, aiming the development of proof-of-concepts and demos, bringing new ideas to life.
- ❖ Present the company as an evangelist in international industry forum and events.
- ❖ The position requires work with customers and peers in the US East and West coasts.
- ❖ The position may require frequent travels abroad.

Qualifications:

- ❖ Meaningful experience as Product Manager\Architect of B2C / B2B2C products or projects – mandatory
- ❖ Experience in defining and launching high-quality consumer applications for mobile, web and over-the-top devices
- ❖ Background and experience in at least one of the following technologies and product domains:
 - ❖ Digital video and TV
 - ❖ AdTech
- ❖ Ability to demonstrate initiative and leadership in a matrix organization
- ❖ Ability to work in geographically distributed environment across multiple time zones
- ❖ Great interpersonal skills
- ❖ Managerial experience (advantage)
- ❖ Excellent English (verbal and written) business communications skills
- ❖ Charismatic
- ❖ Proven track record of innovation

Working as a consultant will also be considered

Technical Writer JB-604

AT&T is currently looking for a highly-skilled Technical Writer to join our Technology Department to produce high-quality documentation that contributes to the overall success of our products. You will work collaboratively with developers, quality engineers, product managers, to make our products easier to use.

Responsibilities

- ❖ Gather, analyze, translate and compose technical information into clear, readable documents to be used by technical and non-technical personnel
- ❖ Work with internal teams to obtain an in-depth understanding of the product and the documentation requirements
- ❖ Create a variety of documents such as release notes, procedures, user guides, online help and process flows using company standards and style guides
- ❖ Communicate technical concepts concisely and effectively to a wide audience
- ❖ Review and enhance existing documentation

Employment is through a contractor

- ❖ Create drawings, diagrams, animation, and charts to increase user understanding
- ❖ Work closely with development teams as well as with product management colleagues to improve documentation development and maintenance processes

Requirements

- ❖ BA in English or a related major, Technical Writing Certificate or equivalent experience
- ❖ 10+ years of experience as a technical writer in a software company
- ❖ Proven working experience with Flare and Camtasia
- ❖ Native English speaker with excellent writing, editing and communication skills
- ❖ Ability to deliver high quality documentation paying attention to detail
- ❖ Experience developing API documentation
- ❖ Experience in creating videos – an advantage
